Full-stack developer transitioning from a career as a Japanese-English translator/interpreter. Accumulated programming experience in PHP, VBA, JavaScript, and Python from various projects throughout education and career now augmented by a MERN-stack web development bootcamp. Possesses advanced fluency in Japanese from experience living and working in Japan as well as research, analytical, presentation and project management skills honed through graduate school research & teaching duties, translation/interpretation experience, and small-scale software development projects. Always looking to learn more while building value that makes users lives better.

POSITION SOUGHT

Full-stack software developer or ML/NLP-related developer position

SKILLS

Tech Skills:

HTML, CSS (incl. Bootstrap & Bulma frameworks), SQL, JavaScript (MERN Stack), Visual Basic for Applications, Regex, Python (ML libraries: Scikit-learn, TensorFlow 2), Java, Git.

- Developing PowerPoint Add-In to automate file-cleaning prior to translation using VBA, Regex, Python, and TensorFlow
- Developing fullstack web app to manage Pokémon collections and provide recommendations for Pokémon Go battles: [GH Repo](#) / [Live App](#)
- Developed online Japanese dialect data viewer with JavaScript and Google Maps

Natural Languages:

English native speaker, fluent in Japanese.
Introductory-level proficiency in Spanish, Korean, and Mandarin Chinese.

A/V:

Audio equipment and online conferencing configuration
(Williams A/V Digiwave, Audio-Technica discussion system ATUC-50, Zoom with interpretation add-on, Microsoft Teams with VoiceMeeter mixing software)

WORK EXPERIENCE

In-house Translator/Interpreter, Corporate Commercial Relations

TS Tech Americas, Inc., Reynoldsburg, OH: August 2014 – Present

- Providing simultaneous & consecutive interpretation for sales and business meetings with customers at all hierarchy levels, for internal technical and business reviews with executive management, for teleconferences with counterparts in Japan, for consultation with legal counsel on commercial issues, and for general in-office conversations and discussions between Japanese & English-speaking staff.
- Developed MS Office plugins in VBA to accelerate pre- and post-translation formatting.
Received Technical Merit award at Honda's Fall 2019 CAN Conference.
- Translating between Japanese & English for sales and sales-engineering presentations to customers, for contracts and legal correspondence, and for internal reports, business plan proposals, and other correspondence.
- Developing machine-learning based system in Python to completely automate pre-translation formatting.
- Managed the adoption of computer-assisted translation technology in corporate purchasing and sales division.

Graduate Teaching Associate, Department of East Asian Languages & Literatures

The Ohio State University, Columbus, OH; September 2012 – May 2013

- Taught beginner/intermediate Japanese (in individualized and classroom settings), developed and performed lesson plans both for daily performance classes conducted in the Japanese and weekly lectures in English.
- Taught Introduction to East Asian Humanities, performing lectures on topics in China, Korea, and Japan.
